This document contains select analyses of findings from the Whole Family Approach survey for the Familia Adelante collaborative. The survey was administered electronically in spring 2022 to all families participating in the Familia Adelante and Families for Literacy collaboratives. It was open to all families enrolled in the collaboratives to participate. Families were compensated for their time completing the survey with a gift card. At the time of survey administration, 109 families were enrolled in the Familia Adelante collaborative; 106 completed the survey; a response rate of 97%. The following analyses reflect Familia Adelante participant responses to a selected sample of survey questions as well as select responses to the survey’s open-ended questions. This is an addendum to a larger presentation of survey findings across the two collaboratives.
